AMENDMENT UNDER 37 C.F.R. §1.111

Sir:

In response to the Office Action dated March 7, 2000, please amend the above-identified application as follows:

IN THE CLAIMS:

1. (Amended) A system comprising:

[1]) a central processing unit (CPU);

[2]) at least one input user interface module connected to the CPU, at least one said [of which interface] module [comprises: I]) comprising means for inputting lead management data for operation upon by the CPU[;], and [II]) means for inputting lead selection parameters for operation upon by the CPU;

[3]) a set of functional modules to be executed by the CPU, wherein: I]) a first functional module comprises a system security capability[; II]), a second functional module comprises a lead management capability[;], and [III]) a third functional module comprises a lead selection capability;

[4) a] CPU means responsive to an input user [requests] request comprising at least one of lead management data and lead selection parameters, the CPU means responding to said request by executing at least one of the first, second, and third functional modules for generating information comprising at least one of: I]) a set of candidate leads[;] and [II])
